Personal Profile

Resident in [REDACTED], born on [REDACTED], [REDACTED]

Start-up's promoter or manager for developing & restructuring process in various kind of industries, mainly Health Care (Pharma & Diagnostics)

Key expertise in markets like Italy and China. Playing the role of Founder, General Manager or Partner in the projects/companies that I contribute to create, develop or restructure. Being still involved in the consolidation of my traditional projects related to Biotech Pharmaceuticals and Diagnostics, recently I've been actively engaged to build a vertical integrated Group in the fields of Environmental Control, Remote Sensing, G.I.S. & Bio-Informatics Genetics software development, with the creation of GeneGIS Holding Group. Since September 2016 a new Geneva venture, Laboratoires Sintyl, also brought me into the Cosmeceuticals, a very promising diversification into my future professional areas of interests!

Next step : Develop an integrated activity in the arena of Bio-Informatics, with the aim to enter into the untapped needs of next generation developments within Health Care which would bring to Personalized Medicine and Companion Diagnostics!

Specialties: Start-up's founder & General Management, Mergers and acquisitions, Negotiations, Restructuring, Business Development, in and out Licensing

Languages : Italian (Native) – French & English (Full Professional proficiency)
